- **Databases and Infrastructure:** PostgreSQL, MongoDB, SQL, SQLite, NoSQL, Docker, Supabase, Firebase
- **Non-technical Skills:** 3D Modeling, Spanish, Blender, Maya, Unity, Figma, Agile Development, UI/UX Design

EXPERIENCE

Course Assistant

Boston, MA

Boston University

September 2025 - Present

- **Lead 370+ students** to master **Python, Go, and Distributed Systems** for CS111 and CS351 through labs and office hours.
- Adapt teaching styles to maximize student engagement and encourage problem solving and collaboration.

Returning IT ServiceDesk Intern

Cayman Islands

Liberty Caribbean ICT

May 2025 - August 2025

- Migrated company information to a new credential management system, **reducing costs by \$200/mo.**
- Implemented AI workflow automation with a **Linux Virtual Machine** and **n8n**, **utilizing scripts and APIs** to streamline ticket handling and **save 30 seconds per ticket.**
- Managed antivirus scans and cloud data backups to maintain system security and client data integrity.
- **Awarded \$3000 scholarship** for outstanding performance and exceptional customer feedback.

IT ServiceDesk Intern

Cayman Islands

Liberty Caribbean ICT

June 2024 - August 2024

- Resolved **networking, software, Azure, Microsoft 365** and printer issues to keep IT operations running smoothly.
- Strengthened client relationships by consistently providing prompt solutions, resulting in positive client feedback.

Computer Repair Technician

Cayman Islands

Simply Computers

June 2019 - August 2019

- Assembled and repaired 15+ computers, laptops, and servers by diagnosing hardware and software issues and applying targeted repair solutions to restore full system functionality.
- Advised clients on tailored technology upgrades, **generating \$500+ in revenue** and enhancing customer satisfaction.

PROJECTS

FilmBoard | filmboard-ashen.vercel.app/

April 2026

- Constructed a full-stack film storyboarding web app with **React, Django**, and **SQLite**, enabling users to organize and manage film ideas through a detailed, clean and responsive interface.
- Designed secure **authentication** and data management systems, allowing users to create, edit, and save structured story element models, including ideas, characters, scenes, scripts, storyboards, images and drawings.
- **Engineered RESTful backend APIs** with Django to handle the relationships between models, ensuring efficient retrieval.

StudyBuddy | youtu.be/YdiD2fnP6Kk

March - April 2026

- Developed a full-stack mobile app using **React Native, Expo, ASP.NET (C#)**, and **PostgreSQL** to connect students with study partners, tutors, and group study sessions through an intuitive, centralized platform.
- Implemented the tutor discovery and booking system, designing logic for matching users with tutors and handling end-to-end booking requests, tutor ratings, and session coordination through **Supabase** and **ASP.NET**.
- Integrated **Stripe** for secure in-app payments, enabling users to offer and purchase tutoring services within the platform.
- Engineered backend services with **ASP.NET** and **Supabase**, whilst other teammates integrated **Firebase** for **authentication**, **Stream** for real-time messaging, and **Google Maps** to help users discover nearby study groups and tutors.

Mini Instagram | cs-webapps.bu.edu/kebanks/mini_insta/

March - April 2026

- Developed a **full-stack** Instagram-like application using **Django, React Native, Expo, HTML**, and **CSS**, enabling users to create accounts, upload posts, and manage their profiles across web and mobile platforms.
- Designed and implemented **RESTful** backend services with Django to handle user **authentication**, post management, and social interactions including likes, comments, and follows.
- Built a personalized feed system displaying posts from followed users, enhancing engagement and content discovery.
